

QUICKLINE®

QC-7700 Clearcoat

An easy and robust product to apply with high can viscosity and a clean in-can colour.

QUICKLINE® QC-7700 Clearcoat

The **Quickline** brand was successfully launched in **2005** and quickly gained a strong reputation thanks to the excellent performance and high quality of its products, which meet your requirements for all collision repair work.

QC-7700 *Quickline* is a two-components acrylic urethane clearcoat, ideally suited for spot and panel repair.

It is an easy and robust product to apply with high can viscosity and a clean in-can colour.

This clearcoat is being launched along with a dedicated hardener QH-4700, but provide perfect results also with the versatile MS Hardener range.

The result is a hard durable finish after the dry cycle, but QC-7700 remains easy to polish if necessary.

Thanks to its quality and performance, QC-7700 clearcoat is the perfect complement to the *Quickline* solvent basecoat system. Together with the *Quickline* thinner range, QC-7700 suits all application requirements and preferences.

QC-7700 <i>Quickline</i> Clearcoat	1 L–5 L
QH-4700 <i>Quickline</i> Hardener	0,5 L, 1 L, 2,5 L
QH-4220 <i>Quickline</i> MS Standard Hardener	0,5 L, 1 L, 2,5 L
QH-4210 <i>Quickline</i> MS Fast Hardener	0,5 L, 1 L
QH-4230 <i>Quickline</i> MS Slow Hardener	0,5 L
